# Gentlemen Prefer Blondes: The Illuminating Diary of a Professional Lady

Anita Loos

This delirious 1925 Jazz Age vintage brought readers to Lorelei Lee, the small-town lady from Little Rock, who has turned into essentially the most undying characters in American fiction. Outrageous and charming, this not-so-dumb blonde has been portrayed on degree and display via Carol Channing and Marilyn Monroe and has turned into the archetype of the footloose, good-hearted gold-digger (not that she sees herself that way). Masquerading as her diaries, *Gentlemen Prefer Blondes* follows Lorelei as she entertains suitors throughout Europe sooner than returning domestic to marry a millionaire. During this delightfully droll and witty book, Lorelei's glamorous pragmatism shines, as does Anita Loos's mastery of irony and dialect.

*Gentlemen Prefer Blondes* by Anita Loos. Do they like blondes? I can't say that I do, yet then I'm no gentleman. The name turns out to be a shadow over *Gentlemen Prefer Blondes: The Illuminating Diary of a Professional Lady* the book. It kind of feels to begin at the improper foot, but if you're thinking that the purpose isn't really all that serious, on account that we're facing a comedy, we will ignore it. Was it the egg or the hen? The publication could have been successful sooner than the movie, yet as soon as Marilyn Monroe bought to play within the motion picture of an identical name, there's absolute confidence that's larger known. The different factor at stake here's the perspective in the direction of girls and of the women. Of course, we're not facing dumb blondes, that's this sort of silly cliché that it may well no longer be worthy placing round it, other than to assert that there are silly blondes, in addition to fool darkish men. Any colour of hair or epidermis has higher and worse representatives. Beauty, nevertheless has been studied via a variety of lenses and within the strangest ways:

- I have learned within the Economist lately that attractiveness and amendment of facial visual appeal has been studied in ...foxes. For greater than 100 years, foxes were bred and it used to be seen that their noses change, develop into flatter as they get tamed. A few good points at the faces of people appear to characterize evolution in possibly related ways.
- What we suggest and *Gentlemen Prefer Blondes: The Illuminating Diary of a Professional Lady* search for after we converse of good looks looks established: a undeniable symmetry, better forehead, flatter noses (like the aforementioned foxes)
- The influence of attractiveness has been studied in all places, including...supermarkets. Specialists have checked out the best way moms deal with their extra appealing and not more beautiful offspring. The great having a look infants are method higher treated, than their much less fortunate counterparts. Moms connect 4 instances extra usually the "nice" infants of their strollers and so they act "better with the great having a look ones". This can be said within the similar The Economist if you want to examine further. I do not realize the fixation on "blondes". If she is sweet looking, she will have blue hair, like in Los Angeles Vie d'Adele (although I used to be now not so a fan of the movie or the actresses- I've got noticeable one in every of them doing an improved role, in a Swiss film, I forgot the name, yet she performs a superb << double >> role- she pretends she is the sister of a tender thief, who's really her son). Talking of which, when you have blue hair, yet you're nice...email me.

In Romania, the problem of blondes will pay tribute to a (still quite) macho culture...we are in the *Gentlemen Prefer Blondes: The Illuminating Diary of a Professional Lady* back of in economic, social, infrastructure terms...but a few males

---

nonetheless take into consideration girls as foolish blondes (or brunettes). it is a evidence of ways a long way we nonetheless need to go. Then we've got a celebrated blonde- Elena Udrea, a favourite of the unpopular president and the subliminal message of a lady is much too current at the airwaves is that – blonde isn't really good. We can recognize her stamina and gumption (maybe even her balls) yet she lacks substance and has made mistakes, enriched her kinfolk and performs a online game of showing simple, cooking cake or whatever, yet spending a fortune on clothier clothes, fancy homes and cars. She may be the no longer very optimistic an identical of the blonde within the book: clever (up to a point), savvy, successful, manipulator and with loads of strength to waste at the political arena. I vote with the right, if she's going to come less than the umbrella of the hot coalition... She has my vote, and that i will prefer... blondes. for my tales (and another reviews) [www.realini.blogspot.ro](http://www.realini.blogspot.ro)
