# THE BURNING

a novel by JAMES E. GUNN

# The Burning by James Edwin Gunn

James Edwin Gunn

the attractive blonde woman with the burning eyes motioned for John Wilson to return closer. "You, John Wilson," she said, "were to blame of the sin of pride. You believed basically in reason, in intellect, in yourself. Now it's time to admit your error. Now it's time to undergo the next power. John Wilson, we're delivering you an opportunity for salvation. put out of your mind you have been a scientist, and subscribe to our ranks. We welcome you, John Wilson, no longer as a scientist, yet as a witch." the woman paused, and placed her fingers on his shoulders. "Tell me, John Wilson, do you agree? certain or no?" "Yes," stated John Wilson. He knew that the doorways to his previous had close fast, and the doorways to an odd and negative The Burning destiny had opened wide...

The Burning, half 1: Witches needs to burn Nein, es ist keine The Burning Zombie-Armee, die die Universität überfällt, in der John Wilson arbeitet. Es sind keine Außerirdischen, die die Gebäude in model legen und auf die fliehenden Dozenten und Professoren schießen. Es ist der Mob, The Burning der mit Billigung der Regierung gegen die Wissenschaftler vorgeht. Dazu The Burning die Stimme des Senators: „They usually are not in charge who've carried destruction to the house of treason and taken loss of life to traitors“ (ein Schelm, wer hier die Stimme Senator Joseph McCarthys zu vernehmen meint). Was haben die Wissenschaftler falsch gemacht, wo liegt ihre Schuld? Es ist das grundlegende Misstrauen der Bevölkerung gegen eine Wissenschaft, die sie nicht mehr versteht; ein Misstrauen, dass bei vielen die Ausmaße einer Psychose angenommen hat. Ist der Wissenschaftler für die Gemeinschaft das, was once der Schamane für andere Gesellschaften ist? guy glaubt nicht mehr an die Gemeinnützigkeit seiner Arbeit, und die Unwissenheit und das Misstrauen in der Bevölkerung werden durch die Intellektuellenfeindlichkeit der Regierung angeheizt. So werden wir Zeuge, wie Wilson, einer der letzten seiner artwork wie weiland Robert Neville in „I am Legend“, seine Identität aufgeben und die Flucht ergreifen muss. Auf die Hilfe ehemaliger Freunde darf er nicht rechnen. Ist dieses Setting, mit dem James E. Gunn 1956 „Witches needs to burn“ eröffnete, nicht unvorstellbar absurd? Nun, ca. forty Prozent der Amerikaner wie auch der Europäer sind heute der Überzeugung, dass der Mensch nicht das Ergebnis der Evolution ist, sondern dass es einen wie auch immer gearteten Schöpfungsprozess gegeben hat, an dessen Spitze stolz und unbeugsam der Mensch als Krone der Schöpfung steht. Offenbar kann guy sich aussuchen, ob guy an die Evolution glauben möchte oder nicht, und ich höre schon widerspenstige Schulkinder murmeln, dass sie nicht an das Alphabet oder das Einmaleins glauben. Und dass The Burning moderne Technik zum Wegfall von Arbeitsplätzen führt, diese Idee ist auch nicht sonderlich absurd. Und so beginnt der erste Teil des Romans „The Burning“, The Burning der aus drei längeren Erzählungen zusammengesetzt ist, die Gunn übrigens lieber als Kurzromane bezeichnet wissen möchte, mit einem aus meiner Sicht auch heute erschreckend aktuellen (Endzeit)Szenario. Zur bedingungslosen Brutalität der Übergriffe gesellt sich dabei die Haltung einer Regierung, für die es keine Wahrheiten gibt, sondern nur Opportunismus: „Wilson stared blindly right into a nook of the booth. So, he thought, there has been an open incitement to murder. The eggheads have been in charge sooner than the research began, inspite of such inescapable facts as wounds and damaged bones and Senator Bartlett's personal statements

at the broadcast of the evening before."Wilson tritt die Flucht in Richtung Südamerika an, wobei ihm ein selbst konstruierter unauffällig transportabler Lügendetektor hilfreiche Dienste leistet, indem er misst, ob sein The Burning Gegenüber ihm feindlich gesonnen ist: "He used to be a physicist focusing on electronics became psychologist. His experimental paintings at the electroencephalograph had grew to become him towards what he had thought of for therefore lengthy an insignificant intuitive art, with no measurements, with no experimentally verifiable exterior data. Then The Burning he observed the chance for placing psychology on an aim basis. With others he had constructed the Tool, the important investigative device."Trotz dieser Warneinrichtung gerät Wilson auf seiner Flucht in die Gewalt der gutaussehenden Blondine Pat Helman, mit der es zu einem Diskurs über The Burning die Selbsterhaltungskräfte einerseits kommt, die die Gesellschaft vor Änderungen bewahren, und andererseits dem Gesetz des Alls, das Veränderung verlangt: „...society can not have the funds for the inventive thinker. He threatens what is, and society cannot tolerate a threat."Pats Lösungsvorschlag "...a dynamic society which may tolerate inventive thinkers since it had dynamic stability, and dynamic defense that might preserve it from flying to all items while swap utilized speed" jedoch ist eine Utopie, und Pat betäubt Wilson, mutmaßlich um ihn auszuliefern. In New Orleans gelingt es Wilson, der dank des instruments vorgewarnt war, Pat zu entkommen und sich für eine Arbeitsstelle in Brasilien zu bewerben. Sein Ansprechpartner vergleicht die Wissenschaftler mit den Hexen im Mittelalter: „When a brand new faith is confirmed in a country, the gods of the previous faith turn into the devils of the new. The satan worshippers, the lads of wierd powers, develop into witches, and witches needs to burn." Und die Gesellschaft hat sich für Sicherheit anstatt Wandel entschieden, was once die Wissenschaftler in die Rolle der Hexen drängt. Im Gespräch wird Wilson schnell klar, dass er auch in Brasilien nicht frei forschen darf, sondern mit seiner Flucht allein sein Leben rettet.Die Flucht misslingt, doch mithilfe technischen Hokusfokus wird Wilson von Pat befreit. Sie ist Teil einer Widerstandsbewegung und sieht die Rolle des Wissenschaftlers in der Zukunft darin, verlässliche Erkenntnisse über gesellschaftliche Abläufe zu gewinnen und die Gesellschaft unbemerkt zu führen. Ein neuer Mythos wird sich um die Hexen-Wissenschaftler ranken.Es handelt sich bei „Witches needs to burn“ um einen Diskurs im Gewand einer Erzählung, nicht um einen Unterhaltungsroman. Die Eingangsszene mit anschließender Flucht lässt zwar Abenteuerelemente vermuten, diese bleiben dann aber weitestgehend aus. Der textual content ist ein ansatzweise dialektisches Gedankenspiel, das den Namen technology Fiction durchaus verdient, geht es doch im Kern um die Zukunft der Wissenschaft. Letztlich dreht sich in diesem textual content alles um die Frage der Rolle der Wissenschaft in der Gesellschaft, dabei wird grob das Muster those - Antithese - Synthese eingehalten. Unterhaltsam ist das leider nicht, und tieferschürfend sind die Gedanken auch nicht. Bei mir führte das dazu, dass ich nach dem ersten (und längsten) der drei Teile das Buch zugeklappt habe. Ob ich den beiden anderen Teilen später eine probability geben werde, muss sich zeigen.
