Fiction. "Murder is afoot, or aslither, in Newport Bay, the atmosphere for Eric Olson's bracingly odd, darkly infolding story of a Pacific Northwest hamlet the place the shellfish have arise to take the air, the townspeople are turning very unusual and the tv cameras are rolling. dual The Procession of Mollusks Peaks meets The dwelling Planet (with a splash of Groundhog Day) during this impressive debut--Olson is off to a thrilling start"--Laird Hunt.

A Pacific Northwest, coastal city is seized through its ardour for the phylum Mollusca as noticeable in the course of the various lucid eyes of an ex-reporter who believes he's a reporter and a tender boy coming-of-age in a docuphile society. Olson created a neapolitan tale; weaving magical realist happenings, noir scenes of a Lynchian motif, and technology classes had Timothy Leary teamed up with nationwide Geographic. I'm no longer ashamed to confess that The Procession of Mollusks this e-book gave me nightmares. Or feral dreams, rather. Olson convincingly sculpted a spiral representation whereas tweaking the nerves that result in these primal locations as soon as suppressed after agriculture and structure have been born. Stirring those ignored tidepools, left at the back of puddles teaming with its personal remoted ecosystem, disturbs many of the extra unforeseen imaginables. Olson explored this sticky territory and had the brass to list a map for others to discover their manner in and again out again.
